Biotechnology, Intellectual Property And Canada's Agri-food Sector Competitiveness

Vincent Robert Amanor-Boadu George Morris Centre

Seed Sector Profile - Agriculture and Agri-Food Canada. Review of issues in Canadian tax competitiveness by Von Massow, Mike, 16, 6, 1992, 1994. Biotechnology, intellectual property and Canada's agri-food sector Biotechnology, Intellectual Property And Canada's Agri-food Sector. Sep 1, 1999. Legal context of intellectual property in agriculture Breeders' Rights Act, and some new biotechnology processes can be protected by patent. Ongoing competitiveness of the Canadian food and agricultural sector through Biotechnology, Intellectual Property And Canada's Agri-food Sector. The Canadian seed industry is the critical first link in the agri-food value chain. This includes biotechnology, genomics, molecular breeding and other plant breeding advances. Canada's seed regulations, quality and purity standards and intellectual property protection help to enhance the industry's competitiveness.
